

VR External Testing

Overview

[Mod](#) is seeking individuals to help us playtest a unique hybrid VR180 video + game for a Meta Quest training experience for Indigenous Top End Rangers.

The first round of playtesting - ETA by Dec - will be using a work-in-progress VR build to test the end-to-end game loop before content is finalised. Another two rounds will be done in early 2026.

We're interested in testers of any experience level who can come to our Haymarket studio for approx 1hr sessions. We are also interested in testing by VR specialists who have the facilities to film themselves testing the app remotely (simultaneous live action third person and screencast recording).

Deliverables

Spend up to 45mins seated to test VR experience
Fill in a feedback form (provided)

All equipment will be provided.

Experience

Testing is open to all experience levels. When applying, let us know which category you fall into.
